

Response Planning for Distribution System Contamination Incidents

November 6, 2018 at 1:00 pm EDT

Register for the webinar

This webinar will provide an overview of the response to a distribution system contamination incident and the steps utilities can take to prepare their own response procedure. It will cover roles and responsibilities when working with response partners. The webinar will also discuss possible response actions that can be implemented to minimize consequences, such as operational changes to reduce the spread of contaminated water and public notification to minimize customers' exposure to contaminated water.

Presented by Bill Platten (U.S. EPA, Water Security Division) and TBD

Attendees can request documentation for continuing education credits when registering for this webinar. Documentation will be provided after completion of the webinar.

Note: Continuing education credit acceptance is contingent on state and/or organization requirements—EPA cannot guarantee acceptance.
