

Preparing for Sampling and Analysis in Response to Distribution System Contamination Incidents

December 11, 2018 at 1:00 pm EST

**Register for
the webinar**

This webinar will provide an overview of capabilities necessary for field and laboratory response to a possible drinking water contamination incident. It will include a discussion of priority contaminants, analytical methods, emergency response sampling kits, and field testing equipment. Lessons learned from utility implementation of emergency response sampling and analysis capabilities will also be presented.

*Presented by Jeremy Bishop (Jacobs)
and Gary Burlingame (Philadelphia Water Department)*

Attendees can request documentation for continuing education credits when registering for this webinar. Documentation will be provided after completion of the webinar.

Note: Continuing education credit acceptance is contingent on state and/or organization requirements—EPA cannot guarantee acceptance.
